PROFESSIONAL SUMMARY

Results-driven **.NET Developer** with **3 years 3 months** of experience delivering high-performance, enterprise-grade web applications and RESTful APIs. Proficient in **ASP.NET Core, Web API, Microservices, Ocelot API Gateway, Dapper, Entity Framework, SQL Server, MongoDB,** and **Docker**. Proven success architecting microservices solutions, reducing DB query time by **40%**, cutting incident resolution by **35%**, and implementing JWT-secured, role-based authentication frameworks. Committed to clean code, Agile delivery, and measurable business value.

CORE COMPETENCIES

- ▶ Microservices Architecture
- ▶ Ocelot API Gateway & Routing
- ▶ Dapper & Entity Framework Core
- ▶ SQL Server Query Optimization
- ▶ RESTful API Design & Development
- ▶ JWT Authentication & Authorization
- ▶ Docker & Containerization
- ▶ MongoDB & NoSQL Databases
- ▶ Database Design & Optimization
- ▶ Performance Tuning & Caching
- ▶ Agile / Scrum Methodology
- ▶ Windows Application Development

TECHNICAL SKILLS

Languages	C#, JavaScript, SQL, HTML5, CSS3	Frontend	Bootstrap 4/5, jQuery, JavaScript, HTML5, CSS3
Backend Frameworks	ASP.NET Core (v5/6/8), ASP.NET MVC (v4.8), Web API, WCF	Security	JWT Auth, OTP-based MFA, SQL Injection Prevention, HTTPS
Microservices & Gateway	Microservices Architecture, Ocelot API Gateway, REST API	Communication	HTTP/HTTPS, TCP Socket, SMS Gateway Integration
ORM & Data Access	Dapper, Entity Framework Core (EF Core), ADO.NET	Dev Tools	Visual Studio 2022, VS Code, Postman, Swagger
Databases	SQL Server (2016+), MySQL (v8), MongoDB	Version Control	Git (GitHub, GitLab), TFS
Containerization	Docker, Docker Compose, Docker Desktop	Project Mgmt	Jira, Trello, Agile/Scrum

PROFESSIONAL EXPERIENCE

RAX Tech International — Chennai, India

Feb 2023 – Present

Software Developer (.NET)

3 Years 3 Months

- Designed enterprise-grade **ASP.NET Core Web API** microservices solutions serving **1,000+ concurrent users**.
- Configured **Ocelot API Gateway** for request routing, load balancing, and rate limiting across distributed microservices.
- Optimized **Dapper / EF Core** data-access layers with indexing and stored procedures, cutting query execution time by **40%**.
- Integrated **MongoDB** for unstructured/high-volume data, enabling real-time analytics and flexible document schemas.
- Containerized all microservices with **Docker & Docker Compose** for consistent, repeatable cross-environment deployments.
- Implemented **JWT-based authentication & RBAC** across all API endpoints for institutional data protection.
- Developed centralized logging & exception-handling middleware, reducing production incident resolution time by **35%**.
- Integrated **third-party SMS gateway APIs** for OTP-based MFA in a bank locker system — zero unauthorized access incidents.
- Built **TCP socket communication** for real-time bi-directional exchange between IoT locker hardware and backend server.
- Led module development for **payment processing, PDF/Excel report generation**, dynamic form builders, and dashboards.
- Maintained **C# WinForms** desktop applications; participated in Agile sprints with **>90% code coverage**.

KEY PROJECTS

1. SmartSchool-Web – School ERP Platform

RAX Tech International | Aug 2023 – Present

ASP.NET Core Web API Microservices Ocelot API Gateway Dapper SQL Server MongoDB Docker Bootstrap JWT

- Architected **microservices .NET Core Web API** ecosystem for school ERP; improved scalability and independent deployments.

- Boosted performance by **40%** via query optimization, in-memory caching, and concurrent DB request management.
- Built modular CRUD layers for admissions, attendance, billing, payroll; developed **payment integration & PDF/Excel reports**.
- Implemented **JWT RBAC**, parameterized queries, structured logging, and centralized error handling across all services.
- Containerized all services with **Docker Compose**; conducted unit testing, bug triage, and performance profiling in production.

2. Access Control System – Bank Locker OTP Authentication

RAX Tech International | Feb 2023 – Jan 2024

- .NET Framework

REST API

Entity Framework

Dapper

SQL Server

TCP Socket

SMS Gateway

TLS/HTTPS
- Developed **OTP-based MFA bank locker access system** — zero unauthorized access incidents post-deployment.
 - Built RESTful APIs for full OTP lifecycle (generate, deliver, validate, expire) with **audit trail logging** in SQL Server.
 - Reduced OTP validation response by **50%** with Dapper optimization; achieved **sub-3-second SMS delivery**.
 - Implemented **TCP socket communication** for real-time bidirectional interaction with physical locker hardware.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering	2014 – 2018 CGPA: 7.8 / 10
Pondicherry University Affiliated Institution Puducherry, India	
Higher Secondary Certificate (HSC – Science)	2014 72.5%
Tamil Nadu State Board	
Secondary School Leaving Certificate (SSLC)	2012 83.6%
Tamil Nadu State Board	

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- ✦ Microsoft Certified: Azure Fundamentals (AZ-900) – *In Progress*

✦ ASP.NET Core Web API Development – Udemy / Coursera

✦ Microservices Architecture with .NET – Online Professional Course

✦ Docker for .NET Developers – Online Professional Course

✦ MongoDB for Developers – MongoDB University

✦ SQL Server Performance Tuning & Query Optimization – Pluralsight

ADDITIONAL INFORMATION

LANGUAGES	DATE OF BIRTH	MARITAL STATUS	AVAILABILITY	LOCATION
English & Tamil	07 July 1997	Married	60 Days Notice	Chennai – 600089
